Final Task

Your group task is to produce a CSI report.

Your CSI report should look at how Otzi lived, and also what killed him.

Information to include;

Discovery of the Body - How and where was the body discovered?

Details of the Victim - Age, Physical Features, Possessions, Lifestyle

Different Theories - Summarise each of the three main theories.

Conclusion - What do you think happened? What evidence supports this?

Success Criteria -

- 1) You have set the information out clearly and neatly, using images and evidence to back up your points.
- 2) You have given an accurate description of Otzi's life, using scientific evidence.
- 3) Your final conclusion uses scientific evidence to support your theory.
